

KEVIN KUHN

GAMEPLAY & TOOLS PROGRAMMER

Simpsonville, SC | (864) 483-4101 | kevin@thekuhnfamily.org | kevin-kuhn.dev | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Gameplay and tools programmer with professional cross-platform application experience and an M.S. in Digital Production Arts. Builds precise Unity gameplay systems, C++ rendering features, practical tools, and reliable mobile products.

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript, Dart

Game & Graphics: Unity, OpenGL, PBRT, gameplay physics, state machines, VR/XR

Product & Tools: React Native, .NET MAUI, Flutter, Git, GameCI

PROFESSIONAL EXPERIENCE

SermonAudio

Jan 2023 - Dec 2024

Mobile App Developer

- Modernized legacy Xamarin applications by evaluating .NET MAUI and Flutter and helping establish a React Native architecture.
- Developed cross-platform product features with an emphasis on reliable media playback and responsive rendering for large datasets.
- Helped ship ChurchOne on iOS and Android in July 2024 while building a reusable foundation for the main SermonAudio application.

EDUCATION

Clemson University

Aug 2024 - May 2026

M.S. Digital Production Arts | GPA: 3.96

- Named Outstanding M.S. Student in Digital Production Arts for exceptional academic and technical performance.

Bob Jones University

Aug 2020 - Dec 2023

B.S. Computer Science | GPA: 3.78

- Graduated one semester early; placed 1st in the 2023 university programming contest and on the 2022 CCSC-SE programming team.

SELECTED PROJECTS

LUMMM

Aug 2020 - Present

Unity, C#, GameCI

- Implemented precise player physics, state-machine logic, and automated WebGL builds and deployments for a collaborative platformer project.
- Reached 100,000+ project video views and 2,000+ downloads on itch.io; maintained an accessible browser-playable build.

Thin-Film Interference Material

Graduate Graphics Project

C++, PBRT, Optical Physics

- Implemented Rouard's method and spectral loops in a custom PBRT material to simulate wavelength-dependent iridescence.

Algorithmic Puzzle Solvers

Independent Projects

C++, JavaScript, State-Space Search

- Built a Baba Is You logic solver using rule-level macro-actions and an interactive polyomino solver using optimized backtracking.
